The Armstrong Institute for Interactive Media Studies (AIMS) empowers students, faculty, and industry to innovate through digital disruption and emerging technology. AIMS is a "horizontal program" that crosses all of Miami University, with faculty, students, and teaching space in all of the Oxford divisions: Arts & Science, Business, Creative Arts, Education, Engineering, and Libraries. AIMS offers a major and three minors, including a game minor, and a number of graduate offerings.

AIMS emphasizes cross-functional knowledge and places a heavy emphasis on making. Students in AIMS develop depth in areas as diverse as web and app design/development, interaction design, user experience design, social media, digital marketing, design thinking, visualization, game design and development, games and learning, digital and algorithmic art, robotics, mechatronics, mobile development, and digital entrepreneurship.

Students are admitted to the major upon successful completion of the following requirements:

- Incoming students can and should declare IMS as their major when they apply to Miami. There are no admission requirements beyond acceptance to Miami.
- For existing students, a 3.00 GPA and portfolio submission. There are a limited number of slots for existing students; acceptance into the AIMS academic programs is competitive and based on a number of criteria beyond GPA.

AIMS emphasizes cross-functional knowledge and places a heavy emphasis on making. Students in AIMS develop depth in areas as diverse as web and app design/development, interaction design, user experience design, social media, digital marketing, design thinking, visualization, game design and development, games and learning, digital and algorithmic art, robotics, mechatronics, mobile development, and digital entrepreneurship.

Interactive Media Studies Courses

**IMS 101. Introduction to IMS. (1)**
This course provides an overview of all of the areas of specialization within the IMS program as well as a review of the landscape of emerging media.

**IMS 102. Digital Experience Bootcamp. (1; maximum 4)**
This one-credit-hour course offers students the opportunity to experience a collaborative project that spans from brainstorming to a deliverable under a compressed timeframe. Offered in concert with Start Up Weekend and Global Game Jam, IMS Experience Bootcamp brings together students, faculty, staff, and experts from the community to engage in rapid iteration and development.

**IMS 111. Introduction to Game Careers. (1)**
In this course, students learn the careers available in game design and development, the basics of games as an academic discipline, and become acquainted with the games faculty and university resources.

**IMS 101. Humanities and Technology. (3) (MPF, MPT)**
Introduction to methods of thinking used in humanities disciplines (literature, history, philosophy, classics, etc.), computer technologies, and their relationship. Practical skills (web page making; research on the Internet) and analytical skills (how to tell good information from bad) combined with theories about the Information Society. IIB, CAS-B. Cross-listed with ENG.

**IMS 177. Independent Studies. (0-5)**

**IMS 201. Information Studies and Digital Citizenship. (3) (MPF, MPT)**
Explores what it means to be information literate in today's "post-truth" world. Students will reflect on ethical and legal issues created by the information age and will develop awareness of the power of information and its effect on society. This course prepares students to ask critical questions about technologies and tools they encounter everyday, apply those skills to their own disciplines, and reflect on their own role as knowledge creators. Students will learn how to critically evaluate information and how information is produced and valued, and explore personal privacy, information ethics, and intellectual property issues in changing technology environments. IIB.

**IMS 203. Applied Digital Humanities. (3) (MPF)**
Explores how digital technologies are transforming scholarly practice. Course is intended for students wishing to explore the use of technology to investigate scholarship in the humanities. Students will collaboratively plan, develop, and create a digital scholarship project over the course of the class. IIB.

**IMS 211. Introduction to Game Studies. (3)**
Offers an introduction to key historical and contemporary research in game studies and theories of play, with particular attention paid to the digital video game. The course surveys current debates and issues in the field of game studies, introduces various methods for interpreting games, and cultivates a deeper understanding of the importance of games and play in contemporary social, political, and cultural contexts.

**IMS 212. Introduction to Game Design. (3)**
This course is an introduction to the many philosophies of game design. Students will learn the core principles of game design, will create games (non-digital) and will learn to iterate and play-test. No previous game design training is required.

**IMS 213. Introduction to Game Development. (3)**
This course introduces students to the process of developing simple 2D games. It is built around a number of game-development challenges that are selected to develop a basic proficiency in 2D game development while learning basic programming and art principles. To complete the challenges, the students are provided with curated online videos and 1-1 in-class instruction.

**IMS 215. 3D Digital Sculpting. (3)**
Digital sculpting is an essential part of 3D content creation. This course needs to be a requirement for students in the game program who want to work as an artist creating assets for video games. This course teaches industry standard software and the methodologies that game studios use when producing professional quality 3D assets for video games and other media. The course is project driven, and grades will be based on the visual quality and passion expressed in the work submitted for assignments, ability to follow instructions for submission and their ability to meet deadlines for assignments. Cross-listed with ART.
**IMS 218. 3D Shading and Texturing. (3)**
In this course, students will learn the workflows necessary to create materials, textures, and shaders for physically based render systems. Students will learn how to edit shaders and materials through the creation and editing of textures in an image-editing program. Students will also be taught the theory behind physically based rendering and how it relates to rendering objects in real time through game engine technology. The course is project driven and grades will be based on the visual quality and passion expressed in the work submitted for assignments, ability to follow instructions for submission, and ability to meet deadlines for assignments. Cross-listed with MUS.

**IMS 221. Music Technologies. (3) (MPF)**
Introduces students to the fundamentals of music technology in the context of its historical and cultural use. Scientific foundations of acoustics, digital audio, and audio engineering as well as technical skills for music production and notation will be addressed. Participants will learn the skills-based foundations of music technology through hands-on projects. Critical discussion will consider the social impact of contemporary and historical systems of recording, notation, and dissemination. Applications in the fields of interaction design, music entertainment, game design, digital signal processing, electrical engineering, music education, acoustics, and mass communications will be explored. IIA, V. Cross-listed with MUS.

**IMS 222. Introduction to Interaction Design and Development. (3) (MPF)**
This course is an opportunity to investigate interactive design and front-end development as it relates to a variety media types. Using industry standard tools, students will learn to design, implement, and refine interactive media for specific audiences. For the purpose of this class, interactive media includes a variety of software and hardware solutions that intersect the domain of human-computer interaction. Effective interactive design is often achieved by the creative application of sometimes disparate disciplines. Students should expect to incorporate their understanding of art theory, psychology, commercial business practice, and creative problem solving. V.

**IMS 224. Digital Writing and Rhetoric: Composing with Words, Images and Sounds. (3) (MPT)**
Students will analyze and produce digital multimodal compositions that integrate words, images, and sounds. No prior web or digital writing experience required. ADVW. Cross-listed with ENG.

**IMS 225. Games and Learning. (3)**
Surveys and assesses the role of gaming within educational research. Topics covered include: games and literacy, designing games for schools, and the learning implications of gaming culture.

**IMS 228. Collaborative Laboratory 1. (2)**
The Co-Lab course sequence is a unique set of courses designed to enable students to work collaboratively on projects of their choosing while being coached and mentored directly by faculty and industry mentors. This will allow sophomores and juniors to begin using their skills to collaborate on emerging technology to build portfolio pieces that will push the envelope of what's possible. Co-Lab 1 focuses on problem/project identification, prototyping, and team-building. Prerequisite: IMS 222 and either completion or concurrent enrollment in IMS 322.

**IMS 229. Collaborative Laboratory 2. (2)**
The Co-Lab course sequence is a unique set of courses designed to enable students to work collaboratively on projects of their choosing while being coached and mentored directly by faculty and industry mentors. This will allow sophomores and juniors to begin using their skills to collaborate on emerging technology to build portfolio pieces that will push the envelope of what's possible. Co-Lab 2 focuses on production. In this course, students will complete the alpha version of their artifact. Prerequisite: IMS 228.

**IMS 238. Narrative and Digital Technology. (3) (MPF, MPT)**
Applies to digital games those notions about narrative structure and character development that have evolved in literature. Students will explore digital art as literary critics, asking whether games are "art" and analyzing how postmodern literary/digital art participates in globalization. Students compose narratives in writing as well as 3D graphics. IIB, CAS-B-Other. Cross-listed with ENG.

**IMS 253. Building and Designing Interactive Devices. (3)**
Building and Designing Interactive Devices is an introduction to Physical Computing for students interested in exploring and building alternative game controllers. Through building simple prototypes, students will learn how to use a variety of switches and sensors, how to build circuits for them, and various ways microcontrollers (like Arduino) can be used with them as well as interface with a variety of computing systems and software. We will prototype using various design lenses including form, function, accessibility, and immersion.

**IMS 254. Design Principles Applied. (3)**
An understanding of design principles is central to the creation of digital solutions and interfaces. This course introduces students to the principles of design in a seminar format with some simple exercises to apply various principles. Whether it be the design of a system/organization or the creation of an application like a website, a design solution is the unification of various elements. This multi-disciplinary approach explores various forms of design and how principles are used to create a holistic solution. No prior design experience required.

**IMS 259. Art and Digital Tools I. (3)**
This course builds a solid foundation for making and manipulating digital images and graphics, and for thinking about the cultural nature of visual materials produced with these processes and software tools. Students will critically engage with a variety of related imagery, from fine art to marketing. Technical theory is coupled with projects to provide hands-on mastery of fundamental ideas, techniques, and specific software tools. Cross-listed with ART.

**IMS 261. Information and Data Visualization. (3)**
Introduction to both static and interactive information and data visualization. Includes basic statistical and design principles for data visuals and diagrams. The course covers the history, context, ethics, and theory of analytical design. Includes application and creation of static and interactive visuals. Prerequisites: IMS 222, IMS 254, and IMS 257/IMS 322.
IMS 277. Independent Studies. (0-5)

IMS 278. Digital Innovation Workshop Preparation. (1; maximum 2)
Introduction to Digital Innovation is a 1 credit hour preparatory course designed for students that have already been accepted into the Digital Innovation Program. The course will cover program requirements, provide city-specific orientations, and support professional development activities in order to best prepare students for success during the program. To be taken the semester immediately preceding participation in Digital Innovation.

IMS 285. Inside the Game Developers Conference. (2; maximum 6)
This Sprint course takes place during the GDC (Game Developers Conference). Students collaboratively prepare for & attend the conference along with their Professor, meet with industry and academic presenters, and return for reflective study and debriefing.

IMS 287. Streaming Media: Twitch.tv and Beyond. (3)
Streaming media has become ubiquitous. In this course, students will learn the mechanics and methods of creating and streaming video.

IMS 304. Electronic Music. (3)
Electronic music history, literature, styles, and studio techniques with emphasis on original expression using digital, editing, multi-track recording, and basic synthesis concepts. Designed for the undergraduate junior or senior, but open to all students. Formal music training not required.
Cross-listed with MUS 304.

IMS 305. 3D Character Design. (3; maximum 6)
In this course, students will create fully realized characters using 3D animation software to be implemented in a game engine. Students will learn a complete workflow for taking a character concept through all stages of a 3D character-creation process. This includes concept art, proper scene setup, 3D modeling, digital sculpting, degrading assets, UV Unwrapping, texture painting, and character rigging, posing, rendering, and importing into a game engine. The course is project driven and grades will be based on the visual quality and passion expressed in the work submitted for assignments, ability to follow instructions for submission, and ability to meet deadlines for assignments.
Prerequisites: ART/IMS 215, ART/IMS 218, and IMS 319 or permission of instructor.
Cross-listed with ART.

IMS 306. Advanced Electronic Music. (3)
Advanced Electronic Music offers an in-depth look at the music studio environment. The course focuses on Ableton Live as the primary Digital Audio Workstation (DAW) and touches on a few other free music apps. Class time is devoted to learning practical skills such as the use of microphones, studio hardware use, and mixing and mastering. Also introduced is Max-for-Live, a relatively simple programming environment that greatly expands on the capabilities of Ableton Live. Synthesis is covered from both a theoretical and practical perspective, including the use of the Doepfer analog modular synthesizer. A survey of historical and contemporary practice in the field will provide the basis for exploring analytical and critical techniques.
Prerequisites: MUS/IMS 221 or MUS 304/IMS 304 or permission of instructor.
Cross-listed with MUS 306.

IMS 314. Game Usability & Human Factors. (3)
Usability and user experience design are critical to the design and production of games. For most games, however, this has been limited to playtesting. While playtesting is important, it only addresses usability after the point that the game has been developed to the point of actual play. As any game designer will tell you, that's late in the process. This course looks at how to utilize existing UX concepts and testing on games, but the class will also focus on how games are different and why games require specific testing and research techniques.

IMS 315. User Experience Research. (3)
We will explore and discuss important concepts in human-computer interaction (HCI) theory and usability, and learn about cutting-edge technologies used to measure the effectiveness of digital media environment design. In so doing, we will pay particular attention to user expectations and how they drive user behavior. The major focus of the course assignments is designing and managing a usability study then reporting on the results of that study.

IMS 317. Writing for Games. (3)
Writing for Games offers students an opportunity to learn the genres and professional standards of writing for games and the gaming industry, including instructions, proposals, design documents, publicity documents, and in-game scripts. ADNV.
Prerequisite: ENG 111.
Cross-listed with ENG.

IMS 319. Foundations in Digital 3-D Modeling and Animation. (3; maximum 6)
(MPT)
Provides knowledge in the underlying concepts and practical skills in the design and development of computer generated 3-D imagery. Examines 3-D modeling; animation, lighting and rendering; character animation; and other related topics.
IMS 322. Intermediate Interaction Design and Development. (3; maximum 6)
This course covers the basic coding patterns and practices present in all programming languages with an emphasis on those languages most common in web and mobile application platforms. It will take students through the fundamentals of algorithm design and then move on to expressing those designs in several popular languages. Because of the focus on web environments, this course will also explore the difference between presentation (such as with HTML) and interactivity (such as with JavaScript). The web and mobile focus will lead to rudimentary discussions on client/server architectures and what content delivery choices are available when a mobile device, such as a smartphone or a tablet, has such strong technical capabilities.
Prerequisite: B- or better in IMS 222.

IMS 328. Collaborative Laboratory 3. (2)
The Co-Lab course sequence is a unique set of courses designed to enable students to work collaboratively on projects of their choosing while being coached and mentored directly by faculty and industry mentors. This will allow sophomores and juniors to begin using their skills to collaborate on emerging technology to build portfolio pieces that will push the envelope of what's possible. Co-Lab 3 focuses on conducting user-testing, research, and product-market fit analyses for their artifact.
Prerequisite: IMS 229.
IMS 333. Digital Innovation and Entrepreneurship. (3) (MPT)
Focuses on building new interactive/digital ventures, venture capital, and private equity with respect to networking technologies in both existing and emerging industries based on opportunity and assembling the resources required.

IMS 340. Internship. (0-20)

IMS 351. Introduction to Mobile Application Development. (3; maximum 6)
Examination of the critical issues related to development of mobile applications; creation of application non-native mobile applications using graphical and script-based programming languages; ethics of mobile applications; mobile media and user interfaces for mobile devices; problem analysis for assessing applicability of mobile solutions.
Prerequisite: IMS 322 or IMS 257.

IMS 354. Intermed Interaction Design. (3)
The synthesis of design principles, usability, and technology is vital to successful interaction design. This course will leverage the exploration of emerging design processes and emerging technology to delve deeper into interaction design. This course challenges students to integrate design principles from a variety of domains to create user interfaces that surprise and delight.
Prerequisites: IMS 254 and IMS 259.

IMS 355. Principles and Practices of Managing Interactive Projects. (3)
Students will prepare themselves for life beyond Miami by learning about leadership, client management, digital project organization, and team work. This course teaches lightweight methods of running an interactive project of any kind, allowing the student to apply what he/she learn through actual project-management and team work.
Emphasizing the latest Agile project management techniques, the course teaches how to manage complex interactive media projects using a leadership philosophy that encourages teamwork, self-organization and accountability.
Prerequisites: IMS 228, IMS 315, IMS 418/IMS 518 or IMS 419/IMS 519, IMS 414/IMS 514.

IMS 375. Human Robot Interaction. (3)
This course introduces basic robotic principles including kinematics, robot architecture and control. The historic context of robotics will be discussed. Students research current technical and societal issues related to human robot interaction. Throughout the course, students develop a project to observe a small humanoid robot interacting with people. The project includes the design and implementation of the robotic activity.
Prerequisite: MME/ECE 303 or IMS 322.
Cross-listed with MME.

IMS 377. Independent Studies. (0-5)

IMS 381. Music for Games. (3)
Music for Games (a) examines the theory and traditions of background or incidental music in various media, (b) discusses how to put theory into practice within game design, and (c) places new music into new games. Students create their own music for their own games or for games of colleagues. Unity is the preferred software platform.
Prerequisite: IMS 221.
Cross-listed with MUS.

IMS 382. The Business of Games. (3)
In this course students will learn the basics of gamification and of marketing games and will learn how to work as an independent developer or start their own games business.
Prerequisite: IMS 211.

IMS 384. Rhetoric of Games. (3)
The study of video games has exploded in the last decade. While the field of "game studies" is still relatively small in academia, when partnered with disciplinary knowledge, the study of the rhetoric of games constitutes some of the most cutting-edge theoretical and practical liberal arts work being done in all of the academy. In this class, students will learn to apply rhetorical thinking and disciplinary knowledge to the study of games. A particular focus will be placed on cultural (race and gender) rhetorics as related to games and gaming.
IC.
Prerequisite: IMS 211.

IMS 390. Special Topics in Interactive Media Studies. (3; maximum 9)
This course offers a rotating series of topics to meet the changing needs and interest of students and faculty, specifically focusing on the varying applications and theories of interactive media. Though designed for those who live in a world of digital media, this course does not teach mechanical skills (PowerPoint, Fireworks, Flash, or Photoshop).

IMS 390C. Special Topics in Interactive Media Studies. (3)
This course offers a rotating series of topics to meet the changing needs and interest of students and faculty, specifically focusing on the varying applications and theories of interactive media.

IMS 391. 3D Character Animation. (3)
Introduction to 3D character animation and motion capture, with a strong emphasis on the principles of animation. The course examines how to design a good character, in a general sense, and how to express personality through motion. The course also covers related topics such as creating video-game animation clips and designing game-engine character controllers. A working knowledge of 3D modeling and animation is required.
Prerequisite: IMS 319.

IMS 396. Inside Startups. (3; maximum 6)
This course is designed to provide students an inside look at some of the most successful startup companies in regional startup ecosystems. It provides a hands-on approach to investigating successful business models. The course is structured around company visits, guest lectures, and company research.
Prerequisite: IMS 278.

IMS 397. Inside the Startup Environment (SF). (3; maximum 6)
(MPF)
This course is designed to provide students an inside look at some of the most successful startup companies in regional startup ecosystems in San Francisco. It provides a hands-on approach to investigating successful business models. The course is structured around company visits, guest lectures, and company research.
IIIIB.
Prerequisite: IMS 278.
IMS 398. Startup Networking. (1; maximum 2)
Professional Networking is designed to complement the internship required in the Digital Innovation Program. Within this course, students will develop relationships with industry experts, build a network of professional contacts, and increase their exposure to the startup ecosystem in their respective cities.
Prerequisite: IMS 278.

IMS 404/IMS 504. Advanced Data Visualization. (3)
Communicating clearly, efficiently, and in a visually compelling manner using data displays. Identifying appropriate displays based on various data characteristics/complexity, audiences, and goals. Using software to produce data displays. Integrating narratives and data displays. Critiquing visualizations based on design principles, statistical characteristics, and narrative quality. CAS-QL. Prerequisites: at least one of the following: STA 261, 301, 368, 671; IMS 261; ISA 205; or by permission of instructor.
Cross-listed with JRN/STA.

IMS 404Y. Mind and Medium. (3)
Courses in three of the primary curricular areas: communication process; history and theory; environmental systems. Offerings vary. May include: housing, contemporary architecture theory and practice, vernacular architecture, urban studies, architectural theory, exploration of graphic media, advanced work in building systems, etc. Seminar descriptions available at departmental office during preregistration each semester.
Cross-listed with ARC.

IMS 407/IMS 507. Interactive Business Communication. (3)
Writing and communicating effectively within business contexts, with an emphasis on researching, reporting, proposing, and maintaining relationships using digitally networked interactive technologies. Cross-listed with ENG.

IMS 411/IMS 511. Visual Rhetoric. (3) (MPT)
Provides an introduction to the theory and techniques of visual rhetoric used by professional communicators. Covers elements of layout, design, and typography, giving students practice with short and longer print texts and non-print media.
Cross-listed with ENG.

IMS 414/IMS 514. Web and Social Media Analytics. (3)
Examines and develops analytical ability with respect to the variety of information provided by web and social media behaviors. Students will learn about the mechanisms for observing behavioral and consumer generated information and the leading-edge technologies that aid in the collection and analysis of these data. We will focus on strategic and practical ways to provide radical personalization, improve consumer relationships, and develop effective and value-driven online marketing activities.

IMS 415/IMS 515. Advanced Usability and User Experience. (3)
This course is the second in a sequence (IMS 315 is the first) focusing on the study of user experience research and design. In this class, students work with a real client to evaluate and redesign an existing interface. As part of this engagement, students are assigned to small groups. They have client contact and consider and carry out the user experience research methodologies (including eye tracking and facial expression analysis) that will be most helpful to their client. After analyzing the data, teams then decide on an interactive design approach to take and work through the steps to build wireframes and a clickable prototype. Finally, they prepare a written recommendations report and client presentation. There is no coding involved.
Prerequisite: IMS 315.

IMS 416/IMS 516. Writing for Global Audiences. (3)
This course focuses on how to write effectively in print and digital media for global audiences. Students will research cross-cultural written communication, including networked communication, and they will develop intercultural literacy skills necessary for writing to global audiences. Through frequent writing assignments, students will learn and enact the theories and strategies for targeting print and digital communications to international and culturally diverse audiences.
Cross-listed with ENG.

IMS 418/IMS 518. Social Media Marketing and Online Community Management. (3)
Traditional advertising and marketing models are being increasingly challenged by a world in which content creation, transmission, and aggregation are being decentralized. Markets are now conversations - some very short. Social media are living conversations that present marketers with the challenge of how to understand and participate in those conversations in an authentic and value-based manner. Moreover, these conversations don't happen in a vacuum. The connected nature of different social (and physical) relationships define a community of interest. The community manager uses this entire space to help bring value to this community. This class examines the variety and taxonomy of social media and the strategies and tactics associated with social media marketing and community management. Recommended prerequisite: IMS 201.

IMS 419/IMS 519. Digital Branding. (3) (MPT)
Survey course emphasizing a hands-on immersion into ECommerce; studies the impact this technology has on the basics of the marketing mix and effective and efficient marketing strategies. Focuses on applications, innovations, and future direction (not on the technology that enables the Internet and www). Heavy reading, electronic and in-class discussions, and ‘surfing’ required (recommended prerequisite: MKT 291).
Cross-listed with MKT.

IMS 421. Digital Product Management. (3)
Digital Product management can be defined as the general business structure within a company that supports and manages all the activities related to developing, marketing and selling a product – or even more than one – all through its lifecycle. Managing a product encompasses everything related to a specific product, from creating a concept and studying the targeted audience to developing, producing and marketing it (and providing customer support afterward). Prerequisites: IMS 228, IMS 315, IMS 414/IMS 514 and IMS 418/IMS 518 or IMS 419/IMS 519.
IMS 422/IMS 522. Advanced Interaction Design and Development. (3)
This course is an opportunity to investigate interactive design as it relates to a variety of media types used by businesses. Using industry-standard measures of effective design methods, students will learn to design and evaluate interactive products for business needs. This includes the design and evaluation of websites, games, kiosk systems, and others. Topics include the use of standard interaction (e.g., mouse, touch screens) but also extend into emerging interaction through eye tracking, computer vision, and haptic interface. Effective interactive design is often achieved by the creative application of sometimes disparate disciplines. Students should expect to incorporate their understanding of art theory, psychology, commercial business practice, and creative problem solving.
Prerequisites: IMS 257/IMS 322 or a working knowledge of HTML/CSS/JavaScript; or by permission of instructor.

IMS 424/IMS 524. Ethics and Digital Media. (3)
Students will focus on key ethical issues related to online writing, communication, and visual design. Course will introduce key ethical principles, including principles of rhetoric, communication, and design ethics, as well as key principles of professional ethics as articulated in fields like professional writing, technical communication, and graphic design. Topics include intellectual property, access and universal design, privacy and surveillance, visual representation and manipulation, global communication and cultural difference, economic issues of justice and equity, and professional rhetorics.
Cross-listed with ENG/IRN.

IMS 426/IMS 526. Developing & Publishing Digital Books. (3)
Digital Publishing offers students opportunities to design, edit, and distribute electronic books. Students will learn theories and processes for digital publishing and work with a number of tools and platforms. They will also learn the genres, standards, and literacies required for web-based and ebook production. Students will gain real-world, client-based experience by assisting a non-profit academic press with the development of new ebooks and the digitization of earlier titles.
Cross-listed with ENG.

IMS 440/IMS 540. Interactive Media Studies Practicum. (4; maximum 8) (MPC)
Examines the tools and methodologies involved in creating and managing the production of new media. Students will study different development models in a real-world setting and work with a client in business or industry to produce an interactive solution. This course particularly focuses on two aspects of the client project: (1) the management of new media development, and (2) the processes that best develop the synergy of an interdisciplinary team working toward a shared goal and the tools of development. It will also emphasize project planning and management. While it may be the case that programmers need to know coding and graphic designers need to know vector graphics, the successful manager will know something about all of these tools, about how they work together, and about how to specialize in one of them.
Prerequisites: (IMS 355 or IMS 421) and (IMS 422/IMS 522 or IMS 351 or CSE 252).

IMS 443. Research Methods in Games. (3)
Research in the games space is different than in some other spaces. Major issues change. For example, what are the ethics of treating an avatar vs. treating a person? When observing a gamer playing, are you observing the on-screen activity, the human holding the interface device, or both? The goal of this course is to explore and better understand these issues.

IMS 445. Advanced Game Design. (3) (MPT)
Develops theoretical foundations, methods, and skills in building complete games. Focuses are placed in particular on the understanding of how design influences gameplay and mechanics.
Prerequisites: IMS 211, IMS 212, and IMS 213.

IMS 452. Senior Degree Project. (3) (MPT) Independent interactive media research project, to be completed in the final year of IMS coursework. This project provides an opportunity for the student to synthesize various strands of their academic work, professional experiences, and knowledge into a work that should stand as a demonstration of the student's accumulated skills and critical perspective.
Prerequisite: IMS 322/IMS 257 and IMS 328.

IMS 453. Indie Game Development I. (3; maximum 6) All IMS students with a games focus must complete an independent project in which they create and publish a finished game (on an online distribution platform). This project provides an opportunity for the student to synthesize various strands of their academic work, professional experience, and design knowledge. Furthermore, it requires the student to develop the ability to scope their projects realistically and see them through within a strict time budget. This is the first of a two-course sequence.
Prerequisite: IMS 211, IMS 212, and either IMS 213 or CSE 251.

IMS 454. Indie Game Development II. (3; maximum 6) All IMS students with a games focus must complete an independent project in which they create and publish a finished game (on an online distribution platform). This project provides an opportunity for the student to synthesize various strands of their academic work, professional experience, and design knowledge. Furthermore, it requires the student to develop the ability to scope their projects realistically and see them through within a strict time budget. This is the second of a two-course sequence.
Prerequisite: IMS 453.

IMS 461/IMS 561. Virtual Reality. (3)
Advanced course in Virtual Reality, 360-degree video, 3D simulations, motion tracking, and 3D data visualization. Provides background, theory, and practice in creating virtual reality simulations, games, training applications, and 3D visualizations. Prior experience with Game engines is strongly recommended (e.g., CSE 251 or IMS 466/IMS 566).
Prerequisites: CSE 251 or CSE 487/CSE 587 or IMS 465 or permission by instructor.

IMS 465. Game Engine Scripting. (3)
This is an advanced game development course meant to build on the introductory game engine groundwork laid by the coding and game development courses students must take as prerequisites. Students will design and code a short series of game prototypes using a commercial-level game engine, increasing proficiency in navigating the engine tools and speed in which they are able to prototype and iterate on game mechanics and design. Guidance and constraints will be provided to keep projects within a reasonable scope. Students are expected to put a great deal of effort into learning how to debug problems and understand engine features while being provided guidance, not answers, by the professor. The goal of this course is to increase student comfort with professional game engine tools and prepare students to learn (and self-teach) increasing advanced features based on their development interests.
Prerequisite: IMS 213 and CSE 251.
IMS 466/IMS 566. Critical Game Development. (3; maximum 6)
It often takes an entire collegiate career for a student to develop their first finished game. This course aims to change this by letting students develop a short game (by themselves or with friends who are also taking the class). The course starts with the development of a game design that has a realistic scope. Afterwards, the students get to use their class time to work, discuss the games, playtest them, and tackle development problems as a group, all under the guidance of an experienced game design professor. The students are expected to invest a minimum of 100 hours into developing this game (which will be divided between home work and in-class time). The goal of the course is for to develop a short game that is publishable on an indie gaming website, such as Itch.io, Game Jolt, Desura, and that can be submitted to design competitions.
Prerequisite: IMS 212, IMS 445 or IMS 487/IMS 587.

IMS 477. Independent Studies. (0-5)

IMS 487/IMS 587. Game Prototyping, Pipeline and Production. (3)
In this class students will learn how to create a contemporary computer game, applying standard techniques for creating art assets, communicating design and developing a playable demo. Students are expected to combine the knowledge and experience they have gained in preceding game courses to design and develop an engaging play experience from concept to completion.

IMS 488. Game Preproduction. (3)
In this course, students will bring together everything they learned during the program and start preproduction for a digital game that they will develop and (independently) publish in the games capstone production class. They learn skills, concepts and competencies that deal with the video game production pipeline. The goal of the course is to finalize the game concept, to complete tech demos, to finish concept art, and to deliver a production plan. As the students work in a team format in which they are assigned a role that corresponds to the role that they seek to take on in the industry after graduating, the deliverables for each student differ based on their role. Programmers will develop tech demos, artists will develop concept art, designers write technical documents, etc. Unique, interesting or unorthodox ideas are encouraged.
Prerequisites: IMS 487/IMS 587.

IMS 489. Game Production. (6) (MPT)
This course follows IMS 488. In this course, students move from pre-production for their capstone game into the production phase. At the end of this course, the game is intended to be completely functional and ready for distribution.
Prerequisite: IMS 488.

IMS 490/IMS 590. Advanced Topics in Interactive Media Studies. (3; maximum 6)
This course complements IMS 390, the IMS "Special Topics" course. This course is taught by various faculty about topics that may be timely, unique, or experimental and are not covered by the permanent curriculum. This course may be a test bed for a future permanent course or it may be a one-time exploration of a topic. Topics vary each time the course is taught. Look for a notation in the course listing that provides additional detail about which special topic is being covered at the advanced level.

IMS 640. Internship. (0-12; maximum 12)

IMS 677. Independent Studies. (0-5)
