

Data Intelligence through Information Technology Minor

For information, contact the CIT Department Office on the Hamilton campus at 301 Mosler Hall, 513-785-3132.

How to store, manage, and use data is a crucial component in almost any current domain or industry. In addition, understanding how data is transformed into information enriches the skills that a student can provide to any organization. This minor will provide students with the opportunity to use tools and techniques across all parts of the data lifecycle, including storage, management, analysis, use, and presentation.

Note: This minor is not open to Farmer School of Business majors.
